

AUSTRALIAN MANUFACTURER OF THE YEAR 2006

LEGEND ACOUSTICS

celebrating 10 years of loudspeaker design

One of Australia's greatest strengths within hi-fi and home theatre equipment manufacturing is that of loudspeaker design, with many of our locally produced brands competing successfully on overseas markets. To be successful in such a super-competitive marketplace speaker manufacturers need to offer buyers products of high quality performance matched with exceptional value for money.

Recently celebrating its 10th anniversary, Legend Acoustics was founded in 1995 by Dr. Rod Crawford and in that time has continually earned much critical acclaim for its range of award-winning loudspeaker products and is a firm favourite with consumers that place sound quality from both music and home theatre as their No.1 priority. As a previous *Audio & Video Lifestyle* magazine Best Buy Awards winner with its Kurlo 3 subwoofer, and again this year with the Legend Mob1 home theatre speaker system (see page 76), we are delighted to present Legend Acoustics with the 2006 Australian Manufacturer Of The Year Award.
